EMPOWERING YOUR BUSINESS.

GETEC PARK.EMMEN

THE INDUSTRIAL PARK OF TOMORROW

SMART, GREEN, EFFICIENT

BIRTHPLACE OF THE POLYMER REVOLUTION

The plastics and polymer industry is undergoing radical change. Decarbonization, digitization and a fast value chain play a decisive role in strategic decision-making and future business development. In addition to production efficiency, the sustainability of the product in conjunction with its affordability is a top priority. Especially in the plastics industry, which is subject to a high level of institutional and social interest, companies are increasingly willing to concentrate on their core business. In order to do this, they need service companies able to provide the full range of infrastructure services efficiently and economically. GETEC PARK.EMMEN, with its competence network and the highest industrial concentration in the northern Netherlands, offers the best conditions in this respect. Its specialization in the production and recycling of plastics and its ideas for high-quality applications of biopolymers are what makes it unique.

GETEC PARK.EMMEN IS YOUR SPECIALIST AND COMPETENCE CLUSTER FOR ENVIRONMENTALLY FRIENDLY, SAFE AND EFFICIENT FULL-SERVICE INFRASTRUCTURES.

GETEC PARK.EMMEN

THE BEST POSSIBLE CONDITIONS FOR YOUR COMPANY

GETEC PARK.EMMEN brings together the experience and expertise gained in 65 years of infrastructural services by the former EMMTEC services to form a comprehensive production and competence cluster for producing and recycling polymers. What makes us different from other industrial estates? Above all, it is the holistic approach to a sustainable and resource-saving handling of raw materials, efficient logistics processes and a variety of analytical services, which enable us to meet our customers' requirements in an efficient but also sustainable way. In addition, we support the energy transition with innovative concepts such as the energetic use of hydrogen or biogas. We also use the energy produced on site to supply the city of Emmen with heat and electricity.

With its ideal connection to the long-distance and rail transport, the estate offers an ideal environment for international companies that are active in research, development and production. The large number of multinational corporations already based in the estate makes it a valuable site.

GETEC PARK.EMMEN offers over 100 hectares of plots and real estate with optimal infrastructure and an ideal logistical location. In addition to existing buildings that can be adapted to the customer requirements, our customers can also be offered freely available areas.

OUR SERVICES AT A GLANCE

Wastewater treatment
Industrial wastewater is biologically purified in our modern wastewater treatment plants.

Analytics
Our laboratory provides analytical data and unique knowledge in the field of (bio) polymers, monomers and chemicals 24 hours a day, 7 days a week and within two hours. Thanks to our mobile laboratories, we can offer this service also outside of GETEC PARK. EMMEN. In addition, our laboratory performs measurements and tests to check health, water and air. We are also specialised in carrying out measurements after asbestos abatement.

Power generation
Sustainable power generation with the help of hydrogen and all the necessary operating resources and media directly on site. Economical, reliable, efficient and environmentally friendly.

„EMPOWERING YOUR BUSINESS IS OUR MISSION. GETEC PARK.EMMEN OFFERS ITS CUSTOMERS THE FULL RANGE OF SERVICES. WE ASSIST YOU SO THAT YOU CAN CONCENTRATE ON YOUR BUSINESS.“

HENDRIK VAN DER PLOEG
CEO GETEC PARK.EMMEN

Parkservices
We provide a range of facility management services for companies at the park; everything from garden upkeep to fire safety, security and cleaning. We also operate a restaurant at the park and can provide catering.

District heating
With us there is no energy loss. Residual heat has been used to heat buildings in the estate for decades. From 2022, this sustainable heating system will be available for district heating in the city of Emmen.

Logistics
We are familiar with complex logistical processes and are experts in logistics solutions. Of course, we also take care of the implementation of logistics procedures. At GETEC PARK.EMMEN we have a selection of means of transport and various warehouses covering a total surface of several thousand square meters. In our logistics centre we coordinate all incoming and outgoing transports and take care of the formalities.

Contracting
GETEC supplies its customers with heating, cooling and electricity safely and cost-effectively. From the planning, through the construction and financing of the energy generation plant to operational management, maintenance and repair, we take care of the energy supply for you with various contracting models. With innovative, modern technologies and an optimized use of energy sources, GETEC noticeably reduces your energy costs.

YOUR ADVANTAGES

Cost reduction

We reconcile ecology and economy. With GETEC PARK.EMMEN as a full-service provider by your side, you can substantially reduce your production costs.

CO₂ reduction

We improve the sustainability profile of your company on the way to zero-impact production and at the same time increase its value – also for the environment.

Comprehensive efficiency

Through a holistic approach, we increase efficiencies in a targeted fashion and provide complete cost-effective solutions to enhance your competitiveness.

The highest standards

GETEC PARK.EMMEN has an environmental classification of 6. We also provide the highest level guarantee of supply. This location is highly qualified for new developments in bio-based chemicals.

Partnership

We not only understand our business, we also understand yours. Your success is our driving force.
